

## FENDER BENDER BUMPER / SUPPORT BAR RULES

### BUMPERS

- A single pipe or tube for fender benders front and rear - max diameter 32mm OD. That must return to the chassis and be within 75mm of the original bumper placement.

### NEW REMIT PASSED – RADIATOR SUPPORT BAR (OPTIONAL)

#### REASON – TO SUPPORT THE FRONT PANNELS FROM BEING PUSHED BACK INTO ENGINE

- A single 32mm OD pipe or tube for fender benders to wrap on the inside of the top radiator support panel following the curves the pipe.
- The pipe shall not exceed further past the centre of your front axle, you must not attach to the front of the strut towers or be placed in a way that will cause harm - e.g. no filling pipe with concrete or placing a smaller pipe inside original 32mm Pipe.
- This pipe shall only be welded in short strips e.g. 50mm long welds

NOTES: OUR CLUB RULES ALLOW 150 X 150 MESH EACH OTHER CLUB IS 75 X 75

BLUE – Pipe

BLACK - Welding
